

## ADVICE TO REFEREES

We seek to publish (in electronic form) a set of review articles on a variety of topics of contemporary interest in quantum optics. As a reviewer please consider the following.

- **Scope:** Does the author achieve an appropriate balance between the scope and depth of the review given the constraints of the page limits?
- **Thoroughness and Clarity:** Are important topics explained with sufficient thoroughness and clarity to adequately explain the subject matter to a reader with a general knowledge in quantum optics?
- **References:** Are sources sufficiently referenced such that interested readers can research the subject on their own?
- **Writing quality:** Is the writing at the level of a professional publishable article?
- **Style/Format:** Is the format acceptable for publication in Physical Review? Are the page limits exceeded? If so, what is your recommendation for editing?

Please recommend one of the following:

- Excellent, accept for publication
- Very good, accept with minor changes
- Good, accept with substantial changes
- Fair, do not accept unless substantial changes are made.
- Poor, do not accept

Please send your report by **email** to [ideutsch@tangelo.phys.unm.edu](mailto:ideutsch@tangelo.phys.unm.edu)
